## TURNING YOUR COMMUNITY INTO A LIVING LAB w/ the City and County of Durham, NC

We believe any local government agency has the ability to champion initiatives that tap into the DNA of their community and use existing resources (or co-create new solutions) to build service capacity.

It all starts with thinking through the strengths of your community and the problems that your organization or team faces, and then brainstorming opportunities for capacity building through innovation-driven partnerships.

Your Name:

Organization:

What strengths do the community and/or people you serve have?

1

What challenges is your organization facing?

2

3

In a perfect world, how would you tap into your community's strengths to build capacity? List your ideas below.
